

Additional instructions

- The alarm code is controlled by the owner.
- If asked, the code will be given to the guests.
- The keypad is located at the left of the main entrance.
- The controller of the automatic gate as well as the key for the manual opening in case of a blackout are located in the drawer of the console at the right of the main entrance.
- The bicycles and the garden umbrella are located at the storage room next to the big bathroom downstairs.
- The kitchen balcony door upstairs locks only from the inside.
- The door of the upstairs porch, for additional security, should be locked by pressing the two buttons, on the inside and the outside of the knob. It is required to press both buttons and the key to open.
- ATTENTION! Do not leave the house keys inside it if there are no people inside, so as to avoid being locked outside.
- The days and hours of the automatic watering there should be no dining tables and other objects at the gardens area.
- In case of water outage, we close the open tap of the network and we open the closed one of the tank. When the flow is restored, we do the opposite.
- The additional water tank operates only with the pressure pump.
- The water taps are located at the boiler room, at the left of the door.
- Instructions regarding the operation of the electrical appliances are located at the last drawer of the chest of drawers at the west bedroom downstairs, along with an emergency flashlight and the First Aid Kit.
- The garbage bins are located outside of the plot, at its north and south area.
- Police: 100.
- First Aid: 166.
- Fire Department: 199.
- For any information call the host at 6977090417.
